Rub-X Project –Request for UN Pilot Support & Hosting of Verified Green Technology

一、项目简介 | Project Overview

Rub-X 是一项独立研发、旨在实现橡胶林自动割胶的绿色发明。系统采用低成本线传动结构，能在山地和偏远热带环境中可靠运行，替代传统高危体力劳动，提升农业生产可持续性。

Rub-X is a field-proven automation system for rubber tapping, designed specifically for remote and hilly plantations. Its low-cost, cable-driven design enables reliable performance without reliance on complex energy or control infrastructure.

Custodial access to patent assets and technical documentation
 - Rub-X 品牌与中英传播材料(含网站、注册商标)
Trademark and bilingual branding materials
 - 可选技术顾问参与
Optional advisory engagement from the inventor
 - 托管框架下的公正使用规范建议
Guidelines for equitable use under hosted framework
-

五、Rub-X 技术中立声明 | Neutrality Statement:

Rub-X 由发明人 Hanmin Hu 独立开发, 专利申请编号为 PCT/US2017/047543。所有知识产权均由个人或私人实体持有, 无任何政府、军方或国有机构背景, 亦未接受任何公共资金资助。

Rub-X was independently developed by inventor Hanmin Hu, with the international patent application number PCT/US2017/047543. All intellectual property is personally or privately held, with no affiliation to any government, military, or state-owned institution, and no public funding received.

六、合作对象限定 | Target Institutions:

Rub-X 当前仅寻求联合国系统或具全球公信力的中立机构进行非商业性托管，不接受其他任何国家级、商业性、军事背景的接洽。

Rub-X is now **open only to United Nations agencies or globally trusted, non-commercial institutions** for public-interest custodianship. No national governments, commercial, or military actors are invited.

七、全球托管的意义 | Why Custodianship Matters
