

✓ Rub-X Project –Request for UN Pilot Support & Hosting of Verified Green Technology

1. Project Overview

Rub-X is a field-proven automation system for rubber tapping, designed specifically for remote and hilly plantations. Its low-cost, cable-driven design enables reliable performance without reliance on complex energy or control infrastructure.

2. Completed Achievements

- Patents granted in CN, US, TH, VN, ID, MY, IN
 - Trademark “Rub-X” officially registered
 - Functional prototype built and tested successfully
 - Registered with the WIPO GREEN platform
 - Official website: <https://www.rub-x.org>
-

3. Request:

Rub-X has completed the invention and functional validation stage. We now request formal **custodianship under a neutral international institution**, such as the UN,

WIPO, or UNDP, for global trial and dissemination. The inventor lacks the resources and institutional capacity to carry this forward independently.

4. Custodianship May Include:

- Custodial access to patent assets and technical documentation
 - Rub-X Trademark and bilingual branding materials
 - Optional advisory engagement from the inventor
 - Guidelines for equitable use under hosted framework
-

5. Neutrality Statement:

Rub-X was independently developed by inventor Hanmin Hu, with the international patent application number PCT/US2017/047543. All intellectual property is personally or privately held, with no affiliation to any government, military, or state-owned institution, and no public funding received.

6. Target Institutions:

Rub-X is now **open only to United Nations agencies or globally trusted, non-commercial institutions** for public-interest custodianship. No national governments, commercial, or military actors are invited.

7. Why Custodianship Matters:

- Prevent suppression or misappropriation of green technology
- To provide fair and affordable automation tools to the regions that need them most around the world.

- Supports SDGs 8 (Decent Work), 12 (Responsible Production), and 13 (Climate Action)
 - Reflects the UN's commitment to inclusive innovation
-

8. Contact:
